*Composite Cans – The Round Alternative*

# Composite Cans – The Round Alternative

Searching for an attractive packaging?  
 Individual shaping desired from the outset?  
 Expecting best quality at low cost?  
 Here you are!

Composite cans with special material combination mean high protection for the product and durable convenience for the customer.

Offset-printed labels with soft or high-gloss varnishing improve the valuable appearance. Also economically for small quantities.

## For Everything To Remain Dry

Composite cans work satisfactorily for decades for dry soups, sauces, cacao, cappuccino, tea and other beverage powder. Membrane and inner layer made of aluminium or laminated with plastic support the protection that your product needs.

Standardized diameter and adjusted length lead exactly to the required volume. Semi- and full-automatically working machines for filling and closing are also available as solutions for manually handling.

## Secure Care

A lot of non-food products mean a challenge concerning secure care and handling. Tightness and dosage are important and playing the main role for the selection of packaging.

## Long Time Effort Requires Long-Lived Packaging

For the wide range of pet-food-products we offer several solutions, too. Twist-off caps meet the expectation for continuous opening and closing very well.

These caps as well as all the other closures are available in many colours. So you can additionally support your brand and corporate design.

## Comfortable Handling

The very seasoning supported by our cans!  
Several tops for strewing and pouring offer the most useful one for each spice, salt or mixture.

**Gifts  
Luxuriously  
Packed**

Finest spirits, wine, specialities, cosmetics and all other beautiful things are well packed in composite cans. For more than 85 years Bega Can produces composite cans for many customers of different trade. This experience and the development of new solutions as well as the middle-class structure are significant for our business and make us a flexible and reliable partner of our customers. Our quality-management-system according to the rules of DIN EN ISO 9001:2000 already has been certified in 1997.

All can bodies are spiral wound with multiple layers of paper. The inner layer can be laminated with aluminium or plastic. The outside surface can be labelled, a white or coloured paper or grey/brown without any special layer.

Below please find our current abilities, pointed out by listing the closures. Please do not hesitate to contact us for a tailor-made solution for your particular product. Other diameters and/or closures can be realized, too.

closure	inner diameter (mm)															
	30	40	45	51	52,5	57	60	63	67	73	80	90	96,5	99	110	125
alu-membrane			x			x				x			x	x		
easy open alu-membrane										x				x		
paper-membrane										x				x		
sprinkler <i>(plastic, tin or Alu)</i>		x	x	x	x	x		x	x	x	x	x	x			
screw top <i>(plastic)</i>			x			x				x			x			
plastic-closures <i>(lids or ends)</i>	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x	x
tin ends (bottom)			x	x	x	x		x	x	x		x	x	x		
cardboardends (bottom)						x				x				x		

Furthermore special closures like ring-pull, easy-opening or metal-lids are available for some diameters.

Please tell us your requirements.
